

I like the Do Not Call law presently in use in my state of NJ. My wife and I have made a free choice that we do not want unsolicited sales calls to our home. I believe a democracy works both ways. While the telemarketers want their choice to telemarket, I want my choice to not receive phone calls to my home that are unsolicited. Since I pay for my phone service and I pay for the right to have a phone number, then I have the right, which I have paid for, to regulate who can use my phone number.

It is really quite simple. So find your funding from some other source besides contributions from the telemarketers.

Thank you.
